

NCLEX-RN Exam Remedial Course (NCNU 002PG)

This course is designed for individuals who have not successfully passed the NCLEX-RN exam. It is designed as a primarily independent study course with tutorials facilitated in a lab setting or through web delivered methods. Access is provided to Lippincott Passpoint, a multifaceted online learning resource that includes online content, remediation for areas identified as needing additional attention, and practice quizzes that simulate NCLEX questions. Unlimited computer adapted testing (CAT) is a unique feature of the product and provides the opportunity to practice NCLEX style questions in a format simulating the exam environment and predictive of success while receiving personalized feedback and review.

The course (NCNU 002PG) can be completed at a distance. The information sessions will be facilitated through web delivered methods, which may include both synchronous and asynchronous offerings. If students are interested in attending in-person tutorials, these will be provided in a lab setting with both practice and review.

The course can be completed within a variable time frame. This provides the individual with opportunities to reflect on areas requiring additional growth and adapt the focus of their study efforts.

It is up to the individual to identify the need for, and to register for, the course. If requested, a certificate of completion will be provided once all components have been completed. Should any additional information or confirmation about completion of the course be required, the individual must identify the specifics needed.

The fee of the course is \$550, which covers the cost of the resources provided. Once the registration form is received, an email will be sent indicating the process for paying the fee. Once the fee is paid, a code to access Lippincott Passpoint resource will be sent through email. Information about the tutorials will also be shared via email.
